

# Moors vs. Muurs: A Hidden History

## Introduction

"All Moors ain't Muurs. And all Muurs ain't Moors. But both are waking up."

For too long, we've been caught in the matrix of miseducation. We've been labeled, categorized, relocated, and renamed so many times we forgot who we were before their paperwork ever touched our lands. But the veil is lifting.

This book is for those ready to break that spell. This is about two great bloodlines-Moors, descendants of African empires and Berber conquerors who brought science to Europe; and Muurs, the original inhabitants of the Americas, copper-skinned tribes with pyramids older than Egypt, erased from history and renamed 'Indians.'

No matter the theory, one thing is clear: somebody stole the birthright, and we're here to take it back.

## Chapter 1: Who Are the Moors?

- Northwest Africa (Mauritania, Morocco, Al-Andalus)
- Berbers and Muslims who ruled parts of Spain from 711-1492 A.D.
- Practiced Islamic mysticism, sacred geometry, high law, and medicine
- Built universities, brought hygiene, astronomy, and mathematics to Europe
- Eventually colonized and broken, some Moors sided with European powers during colonization and slave trades

"They brought law to Europe then got turned into property in the New World."

## Moors vs. Muurs: A Hidden History

### Chapter 2: Who Are the Muurs?

- Indigenous to Turtle Island (the Americas)
- Described by early Europeans as 'copper-colored people' (Webster's Dictionary, 1828)
- Built pyramid cities like Cahokia, Etowah, and Poverty Point
- Names erased, replaced with 'Indian,' 'Negro,' or 'Colored'
- Nations include Washitaw, Yamasee, Olmec, Choctaw, Anasazi and more

'They weren't slaves. They were kings, queens, shamans, builders, and sovereigns.'

### Chapter 3: Clash or Collaboration?

This is where the story gets tricky. Some scholars say the Moors came to the Americas before Columbus, bringing with them advanced tools, sciences, and even Caucasian slaves. Others say they merged with the Muurs and shared knowledge. But oral traditions from the Americas hint at something else: a takeover.

Stories tell of dark-skinned invaders who brought foreign religion, broke tribal codes, and shifted the matriarchal power systems. Some tribes resisted. Others submitted. Over time, the lines blurred.

- Were the Moors rescuers or oppressors?
- Did the Muurs lose their thrones or willingly merge?
- Was it collaboration... or colonization?

Truth is, both bloodlines carry divine memory. But one forgot the land, and the other forgot the law. The split wasn't just physical; it was spiritual.

## Moors vs. Muurs: A Hidden History

"Some came to uplift. Some came to profit. Both now must unite to repair what was broken."

### Chapter 4: The Lost Empires of America

Before the United States, before colonial flags, and even before Columbus this land was already lit.

The Muurs, known by many names—Olmec, Washitaw, Yamasee, Anasazi, Mississippian, and more—built complex societies across Turtle Island. We're talking aqueducts, pyramids, star-aligned cities, trade systems, and spiritual centers that matched Kemet (Egypt) in depth and design.

Sites like:

- Cahokia (Illinois): Pyramidal city with 20,000+ residents
- Etowah (Georgia): Temple mounds and solar alignments
- Poverty Point (Louisiana): Massive earthwork complexes
- Newark Earthworks (Ohio): Geometric, astronomical city planning

These weren't primitive people. These were architects, astronomers, matriarchs, and mystics.

But with the arrival of foreign powers—and even compromised Moors—many of these cities were buried, renamed, or erased from the narrative. What couldn't be hidden was spiritual power—because the ley lines, star alignments, and cosmic signatures still vibrate.

"This ain't no wilderness. This was a kingdom. And you're the heir to it."

## Moors vs. Muurs: A Hidden History

### Chapter 5: Bloodlines, Trusts & Identity Theft

They didnt just take the land. They took the name, the bloodline, and the paper attached to it.

Through a system of forced renaming, censuses, religious conversion, boarding schools, and fake treaties, our ancestors were stripped of nationality and turned into 'wards of the state.' From sovereigns to subjects. From living men and women to legal fictions.

The Muurs were reclassified as:

- Negro
- Colored
- Black
- African American
- Indian
- Latin, Hispanic, Minority, or Other

Meanwhile, their tribal trusts and estate holdings were transferred into the hands of state and federal custodians on paper. Corporations like the United States assumed control over land, mineral rights, and spiritual sites through U.S. citizenship contracts, birth certificates, and social security numbers.

This was not just identity theft it was estate theft. Generations of wealth, land, and birthright were transferred without full disclosure.

"They didnt enslave bodies they enslaved trusts. And now its time to reclaim what was never lost just hidden."

### Chapter 6: Paper Genocide & the War on Memory

This war wasn't fought with bullets; it was fought with paper.

Paper genocide is the process of erasing a people's identity by altering birth records, census classifications, historical narratives, and legal designations. It's the quietest form of warfare. And the deadliest.

The Muurs didn't vanish; they were \*rebranded\* through colonial law:

- Rewritten treaties
- Christian conversion tactics
- Boarding school indoctrination
- Forced name changes (given names over tribal ones)
- Census mislabeling

Even modern textbooks play the role of assassin, pretending that our ancient cities were just 'mound builder mysteries' or that the Olmecs were 'possibly African.' Our pyramids are ignored. Our stories are re-told in someone else's accent.

What happens when a nation forgets its own name?

It becomes a slave to whoever remembers.

"Erase the name, and you erase the claim. But we never forgot; we just had to remember."

### Chapter 7: The Rebirth - Moors & Muurs in the 21st Century

## **Moors vs. Muurs: A Hidden History**

The ancestors didnt die they multiplied.

Across the globe, and especially in the Americas, a quiet reawakening is unfolding. Moors are reclaiming nationalities. Muurs are restoring tribes. People once labeled as 'minorities' are now moving like sovereigns.

This isnt a trend. Its a remembrance.

From trust law to UCC filings, from nationalization proclamations to private community currencies, the descendants of both Moors and Muurs are learning:

- How to correct legal status
- How to claim back land and estate
- How to stand on divine law, not mans statutes
- How to teach, protect, and re-birth the nation through knowledge

Its not about being anti-government. Its about being pro-tribe, pro-truth, pro-remedy.

And its happening in real time.

"The bloodline aint just rising. Its organizing. And this timewe trust ourselves."

## **Chapter 8: Final Word - Reclaiming Divine Estate**

This isnt just a book. Its a call to remembrance.

## Moors vs. Muurs: A Hidden History

The terms Moors and Muurs aren't just labels; they are legacy. They carry the weight of empires, libraries, temples, pyramids, and spiritual contracts that still echo today. To reclaim your name is to reclaim your land. Your law. Your inheritance.

Whether your roots run deep into Africa's sands or Turtle Island's soil, your mission is the same:

- Break the paper curse
- Reclaim your estate
- Restore the memory
- Live lawfully, spiritually, and independently

The truth was hidden in plain sight. But now, the veil is off. And the ancestors are watching.

So call yourself what you will: Moor, Muur, Washitaw, Yamasee, Berber, Anasazi. Just know this:

"You are not lost. You are law. You are land. You are legacy."

- Seeymuur El
